Tellus

A BI-MONTHLY JOURNAL OF GEOPHYSICS
published by THE SWEDISH GEOPHYSICAL SOCIETY

© 1978 The Swedish Geophysical Society.

Editors: B. BOLIN
H. LEJENÄS
Executive Editor: M. SKÅRMAN
Address: TELLUS
Editorial Office
Arrhenius Laboratory
S-106 91 Stockholm, Sweden

Distributor: MUNKSGAARD International Publishers Ltd
35 Nørre Søgade
DK-1370 Copenhagen K, Denmark

Contents

Vol. 30
No. 1
February 1978

C.-Y. Tsay and S.-K. Kao: Linear and nonlinear contributions to the growth and decay of the large-scale atmospheric waves and jet stream . 1

E. N. Lorenz: Available energy and the maintenance of a moist circulation 15

K. Miyakoda, R. F. Strickler and J. Chludzinski: Initialization with the data assimilation method 32

M. A. Estoque and M. Douglas: Structure of the intertropical convergence zone over the GATE area 55

K.-N. Liou, K. P. Freeman and T. Sasamori: Cloud and aerosol effects on the solar heating rate of the atmosphere 62

J. N. Galloway and G. E. Likens: The collection of precipitation for chemical analysis 71

H. D. Freyer: Seasonal trends of NH_4^+ and NO_3^- nitrogen isotope composition in rain collected at Jülich, Germany 83

Short Contribution

J. Wu: A note on minimum wind stress for wave inception 93

Vol. 30
No. 2
April 1978

R. W. Reynolds: Sea surface temperature anomalies in the North Pacific Ocean 97

L. La Valle: Vorticity generation and energy budget over central Italy . 104

B. K. Mukherjee and Bh. V. R. Murty: Features of lower troposphere on occasions of contrasting rainfall at a tropical coastal station . . . 110

S. K. Ghosh, M. C. Pant and B. N. Dewan: Influence of the Arabian Sea on the Indian summer monsoon 117

C. Ramaswamy and R. S. Pareek: The southwest monsoon over India and its teleconnections with the middle and upper tropospheric flow patterns over the Southern Hemisphere 126

R. M. Welch, J. Paegle and W. G. Zdunkowski: Two-dimensional numerical simulation of the effects of air pollution upon the urban-rural complex 136

P. Brimblecombe: "Dew" as a sink for sulphur dioxide 151

R. Delmas, J. Baudet et J. Servant: Mise en evidence des sources naturelles de selfate en milieu tropicale humide . . . . . .

D. H. Ehhalt: The CH_4 concentration over the ocean and its possible variation with latitude 169

P. D. Weidman: Internal solitary waves in a linearly stratified fluid . . . 177

Short Contribution

A. Björkström: A note on the relation between average age and average transit time in natural reservoirs 185

Letters to the Editor

J. G. LOCKWOOD: Comments on "Global mass and energy requirements for glacial oscillations and their implications for mean ocean temperature oscillations" 189

B. SALTZMAN: Reply to J. G. Lockwood 190

Vol. 30
No. 3
June 1978

E. L. PETERSEN and S. E. LARSEN: A statistical study of a composite isotopic paleotemperature series from the last 700,000 years 193

R. DALEY: Variational non-linear normal mode initialization 201

M. J. MANTON: A finite element model of a moist atmospheric boundary layer: Part I—Model equations 219

M. J. MANTON: A finite element model of a moist atmospheric boundary layer: Part II—Method of solution 229

P. J. LAMB: Large-scale Tropical Atlantic surface circulation patterns associated with Subsaharan weather anomalies 240

C. I. ASPLIDEN, R. S. HIPSKIND, J. B. SABINE, P. VALKENAAR and R. L. DESOUZA: Three-dimensional wind structure around convective elements over a tropical island 252

S. LEWIS and A. NIR: On tracer theory in geophysical systems in the steady and non-steady state. Part II. Non-steady state—theoretical introduction 260

T. J. SIMONS: Wind-driven circulations in the southwest Baltic 272

H. KRAUS and E. SCHALLER: A note on the closure in Lilly-type inversion models 284

Vol. 30
No. 4
August 1978

T. SASAMORI and J. W. MELGAREJO: A parameterization of large-scale heat transport in midlatitudes. Part I. Transient eddies 289

T. SASAMORI: A parameterization of large-scale heat transport in midlatitudes. Part II. Stationary waves and the Ferrel cell 300

T.-C. CHEN and A. WIIN-NIELSEN: On nonlinear cascades of atmospheric energy and enstrophy in a two-dimensional spectral index . . . 313

L. BENGTSSON: Growth rate and vertical propagation of the initial error in baroclinic models 323

T. FARAGÓ: Introduction of the characteristic function in stochastic dynamic modelling 335

I. J. EBERSTEIN and J. S. THEON: Vertical temperature and density patterns in the Arctic mesosphere analyzed as gravity waves 341

E. ERIKSSON: The atmospheric carbon dioxide problem 350

R. F. LOVETT: Quantitative measurement of airborne sea-salt in the North Atlantic 358

J. O. Nriagu and R. D. Coker: Isotopic composition of sulfur in precipitation within the Great Lakes basin 365
W. M. Kendall: Unsteady two-cell similarity solution to a convective atmospheric vortex model 376

ol. 30
o. 5
ctober 1978

C.-Y. Tsay, C.-N. Chi and S. K. Kao: Contributions to the growth and decay of large-scale eddy available potential energy 383
S. E. Gryning, E. Lyck and K. Hedegaard: Short-range diffusion experiments in unstable conditions over inhomogeneous terrain . . . 392
J. A. Laurmann: A small perturbation approximation for stochastic dynamic weather prediction 404
R. D. H. Low: The internal cloud radiation field and a technique for determining cloud blackness 418
M. Kerschgens, U. Pilz and E. Raschke: A modified two-stream approximation for computations of the solar radiation budget in a cloudy atmosphere 429
S. Hastenrath and P. Lamb: On the dynamics and climatology of surface flow over the Equatorial oceans 436
M. Schmidt, H. Specht and P. Fabian: Aerosol measurements at the Algarve coast of Portugal 449
W. H. Raymond and G. V. Rao: Boundary layer dynamics of a decaying vortex core 458

Short Contributions
C. R. Carrigan: Instability of a two-layer baroclinic flow in a channel 468
H. L. Bohn: On organic soil carbon and CO_2 472

Short Note
R. W. Tomlinson: The supply from rainfall of four elements to an area of northeast Rhodesia 476

ol. 30
o. 6
ecember
978

L.-O. Merkine: Finite amplitude spatially growing baroclinic waves . . 477
K. E. Trenberth: The effect of Helmholtz term on a two-layer model baroclinic atmosphere 487
J. M. Lewis and S. C. Bloom: Incorporation of time continuity into sub-synoptic analysis by using dynamical constraints 496
N. O. Jensen and E. M. Agee: Vortex cloud street during AMTEX 75 . 517
H. Riehl and G. Greenhut: Energy transfer in the tropical subcloud layer measured with DC-6 aircraft during GATE 524
S. N. Bavadekar and D. A. Mooley: Computation of the average precipitation over the western part of peninsular India during the summer monsoon from the continuity equation for atmospheric water vapour . 537

G. VÁRHELYI: On the vertical distribution of sulphur compounds in the lower troposphere 5
J. S. EATON, G. E. LIKENS and F. H. BORMANN: The input of gaseous and particulate sulfur to a forest ecosystem 5
F.-E. DAHL: On the existence of a deep countercurrent to the Norwegian coastal current in Skagerrak 5
A. BARCILON and M. LESSEN: On the splitting of atmospheric and oceanic turbulent billows 5
B. KOPCEWICZ and M. KOPCEWICZ: On the determination of sources of iron in atmospheric air by the Mössbauer technique 5

Short Contribution
M. JONASZ and M. S. ZALEWSKI: Stability of the shape of particle size distribution in the Baltic 5
